Assignment: The Project

For this project I chose to create a simulated website about diamonds trade and investments.

In this site I included the following;

1. Modernizer as the assignment required
2. HTML5 data visualization charts using canvasjs.
3. Interactive map locations with JavaScript Charts
(<http://www.amcharts.com>)
4. JQuery-scrolling animations
5. Animate css fade in down for top menu
6. Gallery js for lightbox images
7. Audio tag for background music.
8. Draw name, and diamond using canvas
9. Created each section background, buttons, images with Photoshop, and logo in illustrator.

Additional resources;

Images from: Google creative commons and places like Pixabay, Wikia, all label for reuse, and modification. Paid for dreamstime.
